## Easy Energy Efficiency Wins

### Turn off the lights.

If you switch a light off for just a few seconds, you will save more energy than it takes for the light to start up again, regardless of the type of light. This will save you around £19 a year on your annual energy bills.

Leaving electronics on standby rather than switching them off? **You could save £45 each year by taking the plug out.**

### Making a cuppa? Only boil as much water as you need.

Kettles use a lot of energy, so you'll save money and energy by only boiling as frequently and as much as you actually need.

### Speedy showers.

Keeping your shower time to just 4 minutes could save a typical household £90 a year on their energy bills.

### Turn down the heat!

Even turning down your thermostat by just 1°C could save around £165 per year.

**No more running!** A running tap wastes more than six litres of water a minute, so turn off the tap while brushing your teeth or washing your face. Use cold water if you don't need hot.
