June - November 2025

Isn't it time that you got some Phoenix Energy?

Welcome

Whether you are installing a new high efficiency central heating system or a single appliance, there are so many great reasons to switch to natural gas.

- ✓ Instant heat
- ✓ Flexible payment options
- ✓ Constant hot water
- ✓ Controllable cooking
- ✓ A new A-rated gas boiler with the right controls works at cover 90% efficiency
- ✓ Real flame fires
- ✓ No oil tank
- ✓ Reduce your home heating carbon emissions by up to 50%*

If you would like to know more then please contact our customer services team on **03454 55 55 55** or visit **phoenixenergyni.com**

Free Connection to our Natural Gas Network

Free connection to the Phoenix Energy network is available to new domestic connections where natural gas is immediately available*. Phoenix will arrange to supply and install a natural gas service and meter to eligible customers.

To qualify for this offer, you must meet the criteria set out in the Connection Agreement Terms and Conditions, including:

- First 'connection' to the property.
- The availability of a suitable distribution pipeline situated at the front of your property, within 50 metres of the front curtilage and in the same postcode location of the property
- Up to 50 metres of service length free of charge which terminates no further than 2 metres past the front of your property.

*Please refer to the Domestic Connection Agreement Terms and Conditions which are available on our website or available on request in paper by calling 03454 55 55 55. Offer is subject to technical survey where required.

0% Finance

For a limited time only, you can now install a new high efficiency natural gas heating system in your home and spread the cost over two years with 0% interest free credit.

*Terms and conditions apply. 0% interest offer is only available to new customers who request a connection to the Phoenix Energy Network between 16th June 2025 and 30th September 2025. Details of the boiler installed must be recorded on the installer's final receipted invoice. The property owner must install an "A" rated natural gas boiler manufactured by Alpha, Baxi, Glow-worm, Ideal, Vaillant or Worcester Bosch. Offer available up to the value of £3,000. Representative example. Cash price £3,000. Total amount of credit £3,000. Interest rate 0% fixed. Pay 36 monthly instalments of £83.33. 0% APR Representative. Total amount payable £3,000. Credit arranged by Phoenix Energy Registered Gas Installers who are authorised and regulated by the Financial Conduct Authority to carryout credit broking. vvFor more information please contact Phoenix Energy.

Subject to status and affordability.

*Calls to 0345 numbers are charged at the same rate as calls to standard landline numbers starting with 01 and 02. The cost will be the same if you are calling from a landline or mobile. If you have free minutes as part of your mobile phone tariff then calls to 0345 numbers should come out of that and there should be no additional charges on your bill. Calls may be recorded for training or monitoring purposes.

Much more than just a boiler upgrade

It's never been more important to make sure your home is as energy efficient as possible, therefore Phoenix recommend you discuss the following with your Gas Safe registered installer when you are getting a quotation:

Highly efficient boiler

- All gas boilers must have a minimum performance standard of 92% ERP (Energy Related Product)
- Choice of Combination or System Boilers
- Length of boiler warranty available

New efficient control system

Maximise your energy saving with modern heating controls, to include;

- Timer/Programmer
- Room thermostat
- Thermostatic Radiator Valves (TRVs) on all radiators except in rooms with a room thermostat
- Cylinder thermostat (if required)

Magnetic filtration device or suitable alternative

- On-going protection to your central heating system
- **Reduces build-up of 'sludge' within the system**
- Maintains efficiency and helps reduce maintenance costs

Fully cleansed and treated radiator and pipework system

- Central heating system should be thoroughly cleansed and flushed before installation of a new boiler
- Chemical water treatment added to the system to control future scale and sludge formation
- Improves system efficiency and the radiators heat up faster

Installation of a Carbon Monoxide detector

- Gives an instant warning of dangerous Carbon Monoxide levels
- Complies with British Standard EN 50291
- Legal requirement in NI since 31st October 2012
- Required for all fuel types

Helpful Tips

- Phoenix recommend you get at least three quotations for your central heating upgrade
- Ensure your quotation includes all the items you wish to install
- When comparing quotations make sure the specification compares like for like
- All prices should include labour and associated electrical work
- You should ask the installation company if removal of the oil boiler and oil tank is included in the quotation

fuelling the future

Heating for today, that's
ready for tomorrow.

We are working with the NI Executive and a range of industry partners to develop a Renewable Gas industry in Northern Ireland that supports NI's drive to a net zero economy.

Renewable gas solutions such as Biomethane (which comes from converting local organic waste into energy) can be transported within the existing modern gas network and will fuel existing gas boilers without any change to appliances.

In 2023 the first volumes of biomethane were injected into the NI gas network and we look forward to following in the footsteps of other European regions who have already displaced large volumes of natural gas with renewable gas alternatives.

For more info on the
NI Gas Network's
Pathway to Net Zero,
check out our website
